- Executed scalable projects using Zoho's internal frameworks.

Education

PSNA College of engineering and Technology

July 2019 - March 2023

Computer science and engineering

Bachelor of Engineering

Projects

Full-Stack Billing & Organization Management System

Startup Freelance Project

Engineered a monolithic backend from the ground up for production use, featuring payment processing and organisation management.

Slack clone

A personal project to explore complex cases in realtime application. Using frontend expo for making multi-platfrom for both mobile and web using spring boot as backend and postgres as database, key values store , pub/sub

Skills

Java

Building scalable backend services and REST APIs

Redis

OAuth

Spring security

Testing

Test-Driven Development (TDD), JUnit, Postman.

Spring Boot

Applying LLD, Hexagonal Architecture, and Design Patterns for modular software

Postgres

React

expo - multi platform

Communication

pub/sub, websocket, REST API
